

```

import java.util.Scanner;
public class MyClass {
public static void main (String args []) {
Scanner sc=new Scanner(System.in);
int n=sc.nextInt ();
int i=2;
do {
System.out.print(i+" ");
i+=2;
}while (i<=n);

int sum=0, z=1;
do {
sum=sum+(int)Math.pow(z,2.0);
z++;
}while (z<=n);
System.out.println(sum);
sc.close();

int a=1;
do {
int x=1;
do {
System.out.printf("%5d",x);
x++; }while (x<=a);
System.out.println();
i++;
}while (a<=5);
}
}

```
