Exercțiul 1 și 2

```
import java.util.Scanner;
public class Main {
public static void main(String args[]) {
  int n = 0;
 int sum = 0;
 Scanner sc = new Scanner(System.in);
 while (sum < 1000) {</pre>
   System.out.println("Introduceti numerele:");
   sum += sc.nextInt();
  n += 1;
 double avg = (sum / n);
 System.out.println("=======");
 System.out.println("Au fost introduse: " + n + " numere");
 System.out.println("Suma valorilor introduse: " + sum);
 System.out.println("Media valorilor introduse: " + avg);
for(int a=5;a>=1;a--)
for(int c=1;c<=a;c++)</pre>
System.out.printf("%2d",a);
System.out.println();
}
}
                                         Exercițiul 3
import java.util.Scanner;
public class MyClass{
      public static void main(String args[]) {
             Scanner sc=new Scanner(System.in);
             int e=sc.nextInt();
